We also visited the old Roger Williams house and saw the very room where the preliminary examinations of the case charged with the crime of witchcraft were held. We went up Gallows Hill which this hill is not sufficiently high to afford a good view of the city, but a very fine one we afterwards obtained from the old Salem and Boston Turnpike, Highland Avenue. Standing on Gallows Hill it was hard for me to realize that about two hundred years ago a strange and a delusive should have caused the execution of twenty-two persons for nothing but "dealing with the devil."

We also visited the Peabody Academy of Science. As we entered the museum our attention was called to the collection of insects which were arranged according to the names of our countrymen from which the specimens came. I could not begin to tell all I saw, but one thing particularly attracted my attention. It was a curious and delicate wood carving which was supposed to have been the work of a monk of the 14th century. It represented a man and the day of Judgment. The carving was only two and a half inches in diameter and each in a hemisphere. I should judge that there were about a hundred figures in each. I noticed a very ancient looking vase in one of the cases, taken from the ruins of Pompeii in the 17th century. It was very interesting to me. I had read so much about that ancient city. Monday a party of us visited the Drovers' building. It is a large and beautiful building, and is now being used as a warehouse for the manufacture of leather is now the principal industry.

A nervous element was created on the street a few days ago, by the advent of a strange man in town. He was dressed in a dignified individual, and was seen to march up the street and then march down again. This was too much for some of our law abiding citizens, and it was thought best to interview him. The investigation proved satisfactory, and the community has settled back into its former quiet.

The editor and his better half have vamoosed the ranch, and left some of the weight of this institution on our shoulders. Ephraim and the Hub man are the great moguls of the situation. A little case against the correspondents of the Advertiser during this important season of great responsibilities will be greatly appreciated. Any profits on hanging or potato bugs will be received with smiles.

Charles Lloyd and wife have left home for a time. The former is engaged in shoe-making in N. H., the latter visiting her sister, Mrs. Edith Cannel in Wolcott, Mass.

The Joseph S. Bickmore Post G. A. R., will meet in the hall owned by the Ladies Aid Society and not Mr. Edges as was stated in last week's Advertiser.

Salem Letter.

Salem, June 12th, 1884.

EDITOR ADVERTISER:—Saturday last in company with a few friends I visited the old Roger Williams church which is said to be the first Puritan Church organized in America. It is very ancient in appearance both outside and inside. It was built in 1629. It is filled with many articles of interest, among which are a soft brought from Normandy by some French Huguenots about 1686, the first Communion table of one of the early churches of Salem which was erected in 1718, an iron chandelier used a human arm and eighty years ago, the desk used by Nathaniel Hawthorne, a "saw" mortar used by the Indians for pounding corn, a curious stand used by a hundred years ago, and other things of interest. We also visited the old Roger Williams house and saw the very room where the preliminary examinations of the case charged with the crime of witchcraft were held. We went up Gallows Hill which this hill is not sufficiently high to afford a good view of the city, but a very fine one we afterwards obtained from the old Salem and Boston Turnpike, Highland Avenue.
